

## In brief

**Supporting and Reforming the Transport Operator's Competence - Developing a unified training package for the transport operator in Europe.**

The project is implemented by 6 partners from [Finland](#), [Poland](#), [Austria](#), [Italy](#), [Spain](#) and [Bulgaria](#). In addition, the project involves a [Swiss](#) partner who has received separate funding for the project.

The project has started in September 2019 and ends on February 2022.

# Challenges and Success Factors for Transport Companies Conference

On-line conference at 19th of MAY 2021!  
Registration has opened, find country-specific registration links on the TOC project website [Seminar – TOC- Transport Operator Competence \(toc-project.eu\)](https://www.toc-project.eu)

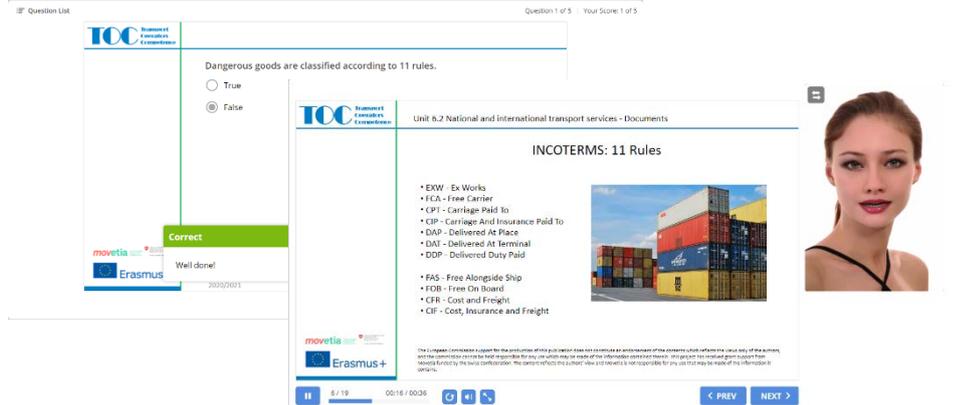

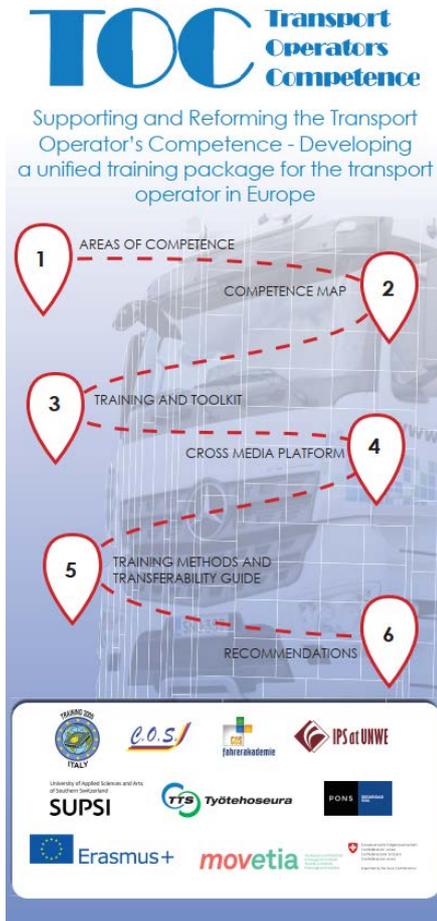

What challenges does today's transport company face in its day-to-day operations? How does the company ensure sufficient expertise to run the business?

The Transport Operators Competence (TOC) conference will be held as an online event 19th of May 2021. Together with stakeholders from all over Europe, we will discuss the challenges and problems of transport companies. The project consortium will present TOC plans and solutions to support the success of transportation companies. Conference participants had the opportunity to exchange experiences and opinions in separate country workshops.

The conference will be a very interesting and fruitful event. The European debate and the exchange of experiences will enrich both the project consortium and the conference participants. We already want to show our gratitude and appreciation to all the guests and speakers who contribute their expertise and experience to a shared interactive learning experience!

# The TOC training material

Based on the competence map, ten learning modules have been developed as part of output 3. These modules are produced with the help of e-learning software, with a focus on the integration of animated learning videos and gamification/quizzes.

In total, learning materials with about 50,000 files and 400 GB of storage have been completed.

The learning content of the 10 modules will be available in English and all languages of the partner countries by the end of May.
